

Lzma

```
classDiagram
    class Lzma
    class LzmaBuffer_In_T["LzmaBuffer< In, T >"]
    class LzmaBuffer_Out_T["LzmaBuffer< Out, T >"]
    Lzma <|-- LzmaBuffer_In_T
    Lzma <|-- LzmaBuffer_Out_T
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Lzma'. Below it are two boxes: 'LzmaBuffer< In, T >' on the left and 'LzmaBuffer< Out, T >' on the right. A horizontal dotted line connects the two lower boxes, with a solid arrow pointing upwards from the center of this line to the 'Lzma' box, indicating that 'Lzma' is the superclass for both 'LzmaBuffer< In, T >' and 'LzmaBuffer< Out, T >'.

LzmaBuffer< In, T >

LzmaBuffer< Out, T >
